80 Since 1932

**Henry Schein** introduces the 2011 **Physician Office Lab Supply Guide**. This guide is intended to serve as an overview of our most popular diagnostic testing options and supplies needed at the point of care. Don't see what you are looking for, ask your Sales Consultant. From rapid test kits to large analyzers, from CLIA waived to highly complex, we have POL solutions for all your needs.

If you have questions regarding diagnostic, pharmaceutical, or vaccine items used in your practice, the DxRx Solutions Hotline is here to help! The DxRx Solutions Hotline can provide CPT Code, package inserts, CLIA product status, product storage requirements, and brand-to-generic comparisons. Let us help you today!

HENRY SCHEIN®
LabTeam™
SOLUTIONS FOR CLINICAL LABS

The Henry Schein LabTeam is a highly trained group of Clinical Laboratory Experts offering lab consultation and analysis to assist your practice in advancing patient care and maximizing revenues.

- **A broad portfolio of the leading laboratory systems available in the market, offering you the best solution for your individual practice needs.**
- **Financial analysis for capital purchases of laboratory equipment providing return on investment and advantageous acquisition programs.**
- **Testing and volume analysis to maximize your lab efficiency.**
- **Professional consultation for CLIA certification.**
- **Knowledgeable, ongoing customer support from our dedicated Laboratory support group.**
- **Laboratory custom solutions available based on customer needs.**

## BD Veritor™ System

**CLIA-waived for Rapid Detection of Flu A+B**

BD Helping all people live healthy lives

- **Proven Performance vs PCR —** PCR is currently the highest sensitivity standard available
- **Reproducibility You Can Count On —** Unique Adaptive Read Technology helps reduce false-positive results
- **Results You Can Trust—** Easy-to-read digital display eliminates subjective interpretation
- **Convenient Workflow—** Testing requires minimal hands-on time

***Medical technology that captures the trusted answer***

QUIDEL CORPORATION

**QuickVue® Influenza Tests**

An immunoassay for detecting influenza types A and B. Three simple steps with results in 10 minutes or less. Color-coded procedure card helps demonstrate each step of test. Kit contains positive and negative controls, and stores at room temperature.

- Detects both A and B types of influenza
- Results in 10 minutes or less, right in the exam room
- CLIA waived
- Color-coded procedure card helps demonstrate each step of the test
- No instrumentation is needed
- Room-temperature storage with up to 24-month shelf life from date of manufacture

QUIDEL CORPORATION

**QuickVue® RSV Test**

- Easy to use
- Dipstick format
- 2-color result in 15 minutes
- 3-step procedure
- Room-temperature storage
- Built-in internal controls
- Kit includes external controls
- CLIA waived

**(227-0581)**.....20/box

CPT® Code: 87807QW†

**BinaxNOW® Influenza A & B Tests**

Rapid test for identification and differentiation of influenza A and B, using specimen collected by nasal washes/aspirates, nasal swabs and nasopharyngeal swabs.

- CLIA waived
- Differentiates types A and B on the same card
- Easy to use: no additional reagents needed
- On-board extraction
- 15-minute results
- Same specimen can be used with BinaxNOW® RSV test

#416-022
**(153-9781)** .....22/box

#400-065, Nasopharyngeal Swabs
**(512-5997)** .....20/box

CPT Code: 87807QW†

**BinaxNOW® *S. pneumoniae* Urinary Antigen Test**

An *in vitro* rapid immunochromatographic assay for the qualitative detection of *S. pneumoniae* antigen in the urine of patients with pneumonia and in the cerebral spinal fluid (CSF) of patients with meningitis. In conjunction with culture and other methods, it is intended to aid in the diagnosis of both pneumococcal pneumonia and pneumococcal meningitis.

- Dependable accuracy
- No results negatively affected by previous antibiotic use
- Self-contained, swab-based device–no tubes or pipettes
- Easy to use: insert urine- or CSF-saturated swab into test card, add reagent, and read results in 15 minutes
- Both built-in and external positive and negative controls ensure test viability
- Accuracy/sensitivity: urine: 86% sensitivity/94% specificity; CSF: 97% sensitivity/99% specificity

#710-000, 22-Test Kit
**(512-0000)**.....ea

CPT® Code: 87449†

genzyme Diagnostics

**OSOM® Influenza A & B Test**

*In vitro* diagnostic test for the qualitative detection of Influenza A and B antigens.

- Differentiates between influenza A and B
- Easy to read: 3 distinct lines
- 2 extra test sticks included for external QC testing
- Nasal swab specimens
- Less than 1 minute hands-on time; results in 10 minutes
- Room-temperature storage
- Moderately complex

**(106-3126)**.....25/box

#191, Influenza A & B Control Kit
**(106-3132)** .....ea

CPT® Codes: Influenza A and B, 87804-59†

**Clearview® RSV Test**

A 15-minute, four-step test for the qualitative detection of RSV. For use with nasopharyngeal swabs and nasal aspirate specimens (approved claim: in children less than 6 years and adults more than 60).

- CLIA waived
- 93.9% sensitivity; 97.7% specificity
- Room-temperature storage
- Built-in control to ensure accuracy
- Shelf life up to 12 months from date of manufacture

**(512-8933)** .....20/box

Contains: 20 test devices, 2 mL extraction reagent solution, 1 mL each positive & negative controls, & 40 disposable pipettes.

# The #1 Rapid Tests Used in Hospitals and Physician Offices Nationwide[1]

## BinaxNOW® Influenza A & B

- Packaged with NP Swab, a CDC preferred specimen type[2]
- Validated for NP Swab, Nasal Swab and Nasal Wash/Aspirate
- Compatible with a dozen common viral transport medias[3]
- Easy Procedure with On Board extraction
- Enclosed card format reduces pathogen exposure
- 24 month shelf life[4]

CLIA Waived

## BinaxNOW® RSV

- Results in 15 minutes with no hands-on time
- Onboard extraction: no extra steps
- Nasopharyngeal swab and nasal wash
- 24 month shelf life4

## CAN REAL-TIME RESULTS LEAD TO BETTER OUTCOMES?

### The potential benefits of point-of-care A1C testing

- The ADA recommends that healthcare professionals use A1C point-of-care testing for timely decisions on therapy changes[1]
- Giving patients with diabetes on-the-spot feedback on their A1C number may result in as much as a 1% point reduction in their A1C over time[2]
- A 1% point reduction in A1C may lower the risk of diabetes complications by up to 40%[3*]

### More efficient than the lab

- Results in 5 minutes
- Portable – use in multiple exam rooms
- Small (5µL) blood sample
- Easy to use – minimal training required
- No maintenance

### Key features

- Lab accuracy
- National Glycohemoglobin Standardization Program (NGSP) certified
- CLIA waived
- Easy to use – minimal training required
- Reimbursable – bill to CPT code 83037

## Bayer's A1CNow+® Multi-Test A1C System

**Bayer's A1CNow+® provides you with a fast and easy way to obtain accurate A1C results in your office. This innovative technology enables you to communicate face-to-face with your patients about their diabetes control.**

| ORDER NUMBER | DESCRIPTION |
|---|---|
| DCD3024 | A1CNow+® Mult-Test A1C System, 1 kit - 10/bx |
| DCD3021 | A1CNow+® Mult-Test A1C System, 1 kit - 20/bx |

### Basic features

- Test time - 5 Seconds
- Memory - 480 results
- Sample size - 0.6µL

### Accuracy

- Auto-calibration
- No manual coding
- Automatic Hematocrit correction

### Advanced features

- 2 Settings — Basic (L1) and Advanced (L2 modes)
- 7-, 14-, and 30-day averages
- 7-day HI and LO summary
- Individual HI and LO ranges
- Pre- and post-meal markers
- post-meal test reminder

Bayer HealthCare

**CONTOUR® Blood Glucose Meter**

Cleared for multiple-site testing, which means more choice and flexibility about where you test: finger, forearm, palm, abdomen, or thigh—it's up to you. However, be sure to talk with your health care professional first to ensure that alternate site testing is right for you.

- No coding required
- Automatic underfill detection
- Automatic control marking
- Automatic temperature control
- Small sample size (0.6 µL)
- Quick testing time–results in 15 seconds
- Saves information for up to 240 tests with time and date

Bayer HealthCare

**BREEZE®2 Meter**

This meter makes testing simple. Its 10-test disc eliminates the struggle with small, individual test strips, and the use of No Coding™ technology ensures easy accuracy every time you test.

- Results in just 5 seconds
- Small sample size
- Large, easy-to-read display
- Ergonomic design is easy to handle
- Single-function buttons for easy handling
- Improved 420-test memory and 1-, 7-, 14-, and 30-day averages

Meter Kit
**(795-0077)**.....ea

Contains: meter, 1–10-strip cartridge, 1 lancing device, 10 lancets & 1 carrying case.
BREEZE® was the first meter to receive the "Ease of Use" commendation from the Arthritis Foundation.

Bayer HealthCare

**BREEZE®2 Test Strip Disc Cartridges**

- Less chance of dropping or losing test strips
- Simply load and go

**(795-7966)**.....50/pkg

Contains: 10 strips per cartridge, 5 cartridges per box.

**OneTouch® SureSoft™ Lancing Devices**

Single-use lancing devices are electropolished, which results in more blood than an acid-washed needle. This means you can use a smaller gauge needle while still ensuring that a sufficient sample will be drawn for point-of-care testing.

- Electropolished needle means a smaller gauge and more comfort for your patients
- Meets OSHA guidelines: nonreusable, retractable needle
- Distinctive wing design prevents reloading and reusing
- Preset gauge for no guessing, no maneuvering and easy training
- On-demand training through Web and CD-ROM programs

Contains: 4 packs of 50.

Roche

**Accutrend® Plus Meter Kit**

- CLIA waived
- Stores 100 results for each parameter (glucose and cholesterol)
- Out-of-meter dosing
- Onboard QC
- Positive strip lot ID
- Fast, reliable results
- Portable
- Room-temperature storage

Complete Kit
#53467544160
**(891-1038)**.....ea

Contains: 1 meter, 4–1.5-V AAA alkaline batteries, 1 user's manual, 1 quick-reference guide, 1 carrying case & 1 warranty card.

Cholesterol Test Strips
#5213312160
2.9% low sensitivity. 173–224 mg/dL range.
**(891-1036)**.....25/pkg

Contains: 25 strips per vial & 1 code strip.

Glucose Test Strips
#11447475160
**(891-0008)** .....25/pkg

Contains: 25 strips per vial & 1 code strip.

Cholesterol Control 2 Level
#5219957001
**(891-1037)**.....ea

Contains: 1 of ea 4-mL cholesterol control level: low & high.

Glucose Control 2 Level
#5213231160
**(891-1039)**.....ea

Contains: 1 of ea 4-mL glucose control level: 2.5% low & 2.4% high.

CPT® Code: 82465QW†

BD

**BD™ Microtainer® Contact-Activated Lancets**

Designed with a positive patient experience in mind. The contact activation method facilitates a consistent puncture depth and minimizes the likelihood of having to repeat the puncture. It covers only a small area at the contact point, resulting in improved visibility of the puncture site for the clinician and greater accuracy of lancet positioning when performing the puncture. Its innovative ergonomic design allows for a more comfortable grip. The lancet automatically retracts into the device, which prevents the lancet from being reused. In addition, the lot number is laser-etched on each lancet for easier tracking.

#366592, Low Blood Flow (Single Drop), Purple, 30-ga x 1.5-mm-D Needle

# Take a new look at diabetes care.

Enhanced and improved patient care

Answers for life.

Offer your patients enhanced care:

- HbA1c results in minutes allows adjustment of patient treatment during the office visit
- Immediate results reduce the need of costly and inconvenient patient call-backs and return visits
- NGSP certified HbA1c test with excellent correlation to reference methods ensures confidence in the results
- Easy to perform CLIA-waived HbA1c test can be performed in any clinical setting

SIEMENS

Bayer HealthCare

**A1CNow+® Test**

This handheld monitor provides accurate in-office A1c results, allowing physicians to make on-the-spot treatment decisions for diabetes patients.

- CLIA waived
- In-office testing; no waiting for lab results
- Results in just 5 minutes
- Hands-on procedure time is less than 1 minute
- Simple, 3-step procedure
- No calibration
- No refrigeration necessary if used within 4 months
- No capital equipment required
- Enables A1c testing in every exam room

**(430-3504)**.....10/box

**(430-1248)** .....20/box

CPT® Code: #83037QW†

**SIEMENS**

**DCA™ Vantage Analyzer**

Point-of-care immunoassay analyzer for diabetes management. Provides precise and accurate quantitative test results for HbA1c in whole blood during a patient's visit to help improve decision making. With a single urine sample, the analyzer also provides quantitative test results for low levels of albumin, creatinine, and A:C ratio in the physician's office or clinic.

#5075US, Analyzer
**(110-0743)**.....ea

#5035C, HbA1c Reagent Kit
**(147-8045)**.....10/pkg

#5068A, Hemoglobin Like Control Kit
**(147-6067)**.....ea
Contains: 2 vials of ea control: high & low.

**#6011A, Microalbumin/Creatinine Reagent Kits**

Detects and monitors microalbuminuria, an early indication of kidney disease. Achieve test results in just 7 minutes from a urine specimen, using the DCA™ Vantage Analyzer. Existing DCA analyzers may be updated with a new program card.

**(147-8917)** .....10/pkg

CPT® Codes: 83036QW†/#82043†/#82570†

## CAN BE USED WITH BAYER A1C OR SIEMENS DCA

Contains: 2 vials of ea control (high & low) & reconstitution fluid.

## SIEMENS

**Multistix® 10LS Pro Reagent Strips**

More reliable tool for detecting kidney disease. Test for glucose, ketone, high protein, low protein, specific gravity, creatinine, pH, blood, nitrite, and leukocytes.

- Creatinine ratio to correct for varying urine concentrations
- Decreases false positive protein and false negative protein rates
- For over-65 patients and those with diabetes, CVD, or UTI
- Indication of a dilute requires patient to submit specimen, triggering another urine sample
- Automatic identification of strip configuration for Clinitek® 50 users

#1566
**(147-8028)**.....25/btl

#1554
**(147-2360)**.....100/btl

CPT® Codes:
81000†/81001†/81002†/81003†/82570QW†

## SIEMENS

**CLINITEK® Microalbumin Test Strips**

Test for semiquantitative determination of microalbumin/creatinine in urine. Semiquantitative tests for protein (2–4 mg/dl) and creatinine. Includes an A:C ratio result.

- CLIA waived on CT status analyzer
- Dip-and-read test for albumin and creatinine in urine
- Determines an A:C ratio for greatest accuracy
- Use a random urine sample–reduces need for a 24-hour collection
- Timeframe: 60 seconds

#2083

## Roche

**Chemstrip® Micral Test Strips**

Test for microalbumin. Fast, easy test to detect subclinical neuropathy.

- 1-minute test
- In office
- Accurate compared to radioimmunoassay

#417146
**(891-6088)**.....30/btl

CPT® Code: #82044QW†

## HEMOCUE

**HemoCue® Albumin 201 System**

Can be used for quantitative determination of low levels of albumin in urine for the purpose of screening, diagnosis, monitoring, and supporting clinical evidence in the treatment of microalbuminuria. The system consists of a small, specially designed analyzer and individually packaged microcuvettes containing freeze-dried reagent. The test is performed at the point-of-care, using a microcuvette filled by capillary action. To obtain a quantitative result, fill the microcuvette, place it in the analyzer, and read the result. The system is based on an immunoturbidimetric reaction using antihuman albumin antibodies.

The antigen-antibody complex creates turbidity, which is measured photometrically at 610 nm. The albumin concentration is proportional to the turbidity, and the result is shown on the display in mg/L.

Analyzer Kit with 1 Box of Microcuvettes
**(111-5593)**.....ea

Albumin Microcuvettes
**(111-5591)**.....50/box

## genzyme Diagnostics

**OSOM® ImmunoDip® Urinary Albumin Tests**

Rapid urinary albumin test for microalbuminuria to aid in the early detection of kidney disease.

- CLIA waived
- Easy to use: simply place test device into urine sample
- Fast: results in 3 minutes
- Accurate: albumin, greater than 18 mg/L indicates positive result
- Specificity 99%, sensitivity 98%
- 18-month shelf life
- Room-temperature storage

Flo-Med™ 1100

# Precision Uroflowmetry System by

HENRY SCHEIN® MEDICAL

## What is the Flo-Med 1100 by Henry Schein?

It is a simple, non-invasive diagnostic screening device used to calculate the flow rate of urine over time. This aids in diagnosis of bladder and sphincter function as well as prostate conditions.

**112-5811 Flo-Med 1100 Uroflometry System**
**112-5812 Flo-Med Disposables case of 24 sets**

- Easy to use (hygienic & convenient)
- Height adjustable
- Battery operated
- Wireless or hardwire capable
- CPT 51741
- Compact/portable
- One-touch technology
- Easy calibration
- PDF can easily be stored into an EHR

**System Requirements:**
Windows 7, XP, Vista
Hardwire compatible with PCL5 Printer

**(112-5811)**
Precision Uroflowmetry System, 1 Unit
**(112-5812)**
Cup & Funnel Disposables

Other accessories such as Laptops and printers are available separately.

### CLINITEK® Advantus™ Analyzer

With Bar-Code Reader

For laboratories or practices requiring medium to high throughput (up to 500 tests per hour). Respond to demands for higher productivity and high quality. Streamline your workflow with flexible operation. Immediate start-up. Automatic calibration, network ready, and offers the widest range of test options. Added QC features.

- Easy-to-use color touch-screen
- Ability to consolidate microscopy results onto one patient record
- QC lockout available or automatic prompting if regimen is not followed
- Testing flexibility with simple, one-touch switching between different strip configurations
- Three sieve functions–confirmatory and microscopic–to flag abnormal results for quick review
- Convenient data retrieval for up to 500 patients by patient ID
- 200 control results
- Streamlined operation with immediate start-up
- Improve efficiency with nonpacing processing
- Improve accuracy with automatic calibration for every strip
- Continued productivity boost with throughput of 7 seconds per sample
- Minimize errors with simple, bar-code identification of sample, color, and clarity values
- Flexibility in reporting options, on-screen display, printout and/or uploading to laboratory information system

# When quality is at the core of every decision you make…

**Trust Hemoccult ICT**—the only Immunochemical fecal occult blood test clinically tested over an extended duration and proven to work. Our dry-slide process has provided excellent proven results for over 40 years.

**Excellent 14-day stability**—developed with dry-slide technology, which increases stability of the sample—allowing for multiple-day collection and necessary transit/development time.

**Higher sensitivity and specificity**—clinically proven to have a relative sensitivity of 100% and apparent specificity of 99.1%.

**No drug or dietary restrictions**—Hemoccult ICT is specific to intact human hemoglobin—eliminating interactions from red meat, Vitamin C and other factors that lead to false positives.

**The right choice**—meeting the American Cancer Society and the U.S. Task Force for Colorectal Cancer (CRC) Foundation recommendation of multiple-day testing for CRC.

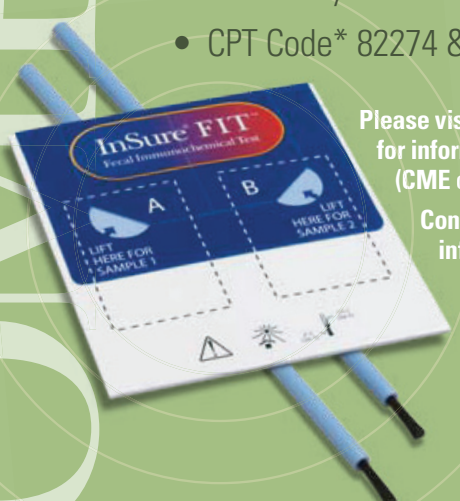
COMPLIANCE

# Are you struggling with patient compliance when it comes to colorectal cancer screening?

## InSure® FIT™ boosts compliance[1] with a patented water-based collection method and 2 samples on a single card.

- 87% sensitivity for colorectal cancer[2,3]
- 98% specificity[3]
- 66% increase in patient compliance versus a guaiac-based fecal occult blood test (gFOBT) was found in one study[1]
- No handling/smearing of dry, solid fecal material[3]
- No dietary or medicinal restrictions[3]
- CPT Code* 82274 & Medicare Code G0328



**Please visit DiagnosisCAST.com and click on ColonCancerWRAP for information on new advances in colon cancer screening (CME credit available).**

**Contact your sales representative or go to Insuretest.com for information and to order InSure® FIT™.**

InSure® FIT™
Fecal Immunochemical Test

Colorectal Cancer Screening
That's Easier to Live With

1. Cole SR, Young GP, Esterman A, Cadd A, Morcom J. A randomised trial of the impact of new faecal haemoglobin test technologies on population participation in screening for colorectal cancer. J Med Screen 2003;10:117-122. 2. Smith A, Young GP, Cole SR, Bampton P. Comparison of a brush-sampling faecal immunochemical test for hemoglobin with a sensitive guaiac-based faecal occult blood test in detection of colorectal neoplasia. Cancer 2006;107:2152-2159. The study was funded in part by Enterix Inc. (through Enterix Australia Pty. Ltd.), the manufacturer of InSure® FIT™. Enterix is now owned by Quest Diagnostics Incorporated. However, neither Enterix nor Quest Diagnostics participated in the data analysis or influenced the conclusions reached by the authors. 3. InSure® FIT™ Fecal Immunochemical Test Immunoassay for human hemoglobin in stool. Product Instructions. Enterix Inc., Edison, NJ.

Manufactured by Enterix Inc., Edison, NJ 08837 USA, a Quest Diagnostics Company. For more information about InSure® FIT™, please visit www.insuretest.com. **InSure® FIT™ Fecal Immunochemical Test (FIT)**

Test provides high sensitivity and ease of use with a simple, water-based collection method designed to be more patient-friendly. The patented brush sampling replaces unpleasant fecal collection or smearing. No dietary or medicinal restrictions, enhanced specificity and sensitivity for more productive colonoscopies. The InSure® FIT™ is based on the immunochemical detection of human hemoglobin (Hb) as an indicator of blood in the stool. The assay uses a monoclonal antibody to capture Hb on a test strip during test development. Since globin does not survive passage through the upper gastrointestinal (GI) tract, the presence of globin in the stool indicates bleeding in the colon or rectum. Clinical studies have demonstrated high sensitivity and specificity of the InSure® FIT™ test in colorectal cancer screening.

- 87% sensitivity for colorectal cancer*
- 98% specificity*
- 66% increase in patient compliance vs. a guaiac-based fecal occult blood test (gFOBT) was found in one study*
- No handling/smearing of dry, solid fecal materials*

# BD Affirm™ VPIII
## Microbial Identification System

### The Problem:
**Mixed vaginal infections.**

One of every four vaginal infections are caused by two or more organisms: *Candida* species, *Gardnerella vaginalis* or *Trichomonas vaginalis*.

Failure to diagnose these common causes of vaginitis can carry significant risk for your patients. Trichomoniasis and bacterial vaginosis (BV) are associated with increased risk of HIV infection, delivering preterm, low birth weight babies and, if untreated, PID.[1,2]

[1] *Trichomoniasis*, CDC, Div. STD. Fact Sheets Sept 2000.
[2] *Bacterial Vaginosis*, CDC, Div. STD. Fact Sheets Sept 2000.
[3] Data from package insert.

BD, BD Logo and Affirm are trademarks of Becton, Dickinson and Company. ©2009 BD

### The Solution:
**1 molecular test that detects & differentiates 3 organisms.**

The BD Affirm™ VPIII system quickly identifies and differentiates three pathogens from one single test. The Affirm VPIII technology provides RNA accuracy to enable targeted therapies.

- Results in < 45 minutes
- Enables proper therapy, the first visit
- Unaffected by difficult specimens: menses, sperm or creams from self medication.[3]

**Learn more about Affirm VPIII testing in your laboratory, call 800.553.3470.**

## STDs—HERPES

**biokitHSV-2 Rapid Test**

For Herpes Simplex Virus 2

A type-specific glycoprotein G (gG-2) immunoassay kit—a leading aid in the diagnosis of genital herpes. Two-reagent system.

- Results in less than 10 minutes
- Finger-stick blood or serum specimens
- Built-in procedural codes

#3000-28001
**(630-3080)** .....20/box
CPT Code: 86696†

## C. DIFFICILE

osom QC inside

**OSOM® C. Difficile Toxin A/B Test**

- Detects both toxins: A & B
- Excellent sensitivity and specificity
- Just 4 simple steps
- Includes 2 additional test sticks for external QC testing
- Less than 1 minute hands-on time; results in 20 minutes or less

C. Difficile Toxin A/B Test

HENRY SCHEIN®
**ONESTEP+ MONO CASSETTE TEST**

A rapid chromatographic-immunoassay for the qualitative detection of infectious mononucleosis in whole blood, serum, or plasma.

- CLIA waived
- Finger stick or collection tube
- Room-temperature storage
- Includes controls

Complete Kit
**(900-4070)** .....20/box

Contains: 20 pouched test devices with disposable sample droppers; disposable, heparinized capillary tubes with dispensing bulb; 1 of each control (positive & negative); 1 sample buffer; 1 procedure card & 1 package insert.

CPT® Code: 86308QW†

**NO AGE RESTRICTIONS!**

HENRY SCHEIN®
**ONE STEP PRO+ MONONUCLEOSIS TEST KIT**

- CLIA waived for whole blood
- No age restrictions
- Measures heterophile antibodies in whole blood, serum and plasma
- Uses best technology of bovine derivatives, which eliminate cross reactivity
- Room temperature or refrigerated storage
- Two internal controls exist to avoid additional cost and ensure good laboratory practice
- Only 25 µL blood needed

Mono Test Kit
**(112-5547)** .....20/box

Contains: 20 test devices, 1 developer solution, 1 negative control, 1 positive control, 40 sample transfer pipettes (20 for serum/plasma & 20 for whole blood), 1 procedure card & 1 package insert.

CPT® Codes: 86308QW† (Whole Blood) / 86308† (Serum/Plasma)

QUIDEL CORPORATION
**QuickVue+® Infectious Mononucleosis Test Kit**

- IgM-specific test
- Results in 5 minutes
- Easy to read +/- test result
- 99% sensitivity and 99% specificity
- CLIA waived for whole blood
- Flexible specimen-collection options

#20121
**(227-0024)**.....20/box

Contains: 20 test cassettes, 1 developer, 1 of ea control (negative & positive), 20 sample pipettes & 20 capillary tubes.
CPT® Codes: Whole blood: 86308QW†; Serum: 86308†

BECKMAN COULTER
Primary Care Diagnostics
**ICON® Mono Test Kit**

Approved for testing on all ages. Combines fingerstick whole-blood convenience with EIA membrane technology for fast, accurate results. Uses direct solid-phase immunoassay technology for early qualitative detection of IM heterophile antibodies in whole blood, serum, or plasma. Serum/plasma is moderately complex.

- Whole-blood-test waived
- 99.9% relative sensitivity and 98.8% relative specificity of serum/plasma
- 98.3% relative specificity of whole-blood assay

**(111-7123)** .....30/box

Contains: 30 test cassettes, 1 developer solution, 1 of each control (negative & positive), 1 bulb & capillary tubes.

CPT® Code: 86308†

Alere™
**Acceava® Mono Cassette**

The high-performance mononucleosis diagnostic test for whole-blood, serum, or plasma samples.

- CLIA waived for whole-blood procedure only
- FDA cleared with no age limits
- Positive results in 8 minutes
- Superior sensitivity at 99.9% for earlier IM detection
- Specificity of 98.8%
- External positive and negative controls provided with your kit—no additional purchase is necessary

#92407

HemoCue®

**Hb 201+ Handheld Hemoglobin Analyzer**

Offers the same important benefits as its predecessor, the B-Hemoglobin Photometer. Smaller size gives more flexibility and mobility to use the system anytime and anywhere. Performs an internal self-test. No control cuvette required.

- Produces results in less than 1 minute with lab-quality accuracy
- 3 easy steps
- Precalibrated, portable analyzer that requires minimal maintenance
- No calibration or instrument manipulation (between cuvette/reagent batches) is needed
- Safe and easy to use
- Reimbursable
- CLIA '88 waived
- 2-year warranty

Analyzer
**(345-2344)** .....ea
Contains: analyzer, AC adapter, manual & training CD-ROM.

#3201 Microcuvettes
**(110-9167)** .....100/box
Contains: 4 packs of 25.
**(345-8733)** .....200/box
Contains: 4 packs of 50.

esa
MAGELLAN BIOSCIENCES

**LeadCare® II Analyzer**

Accurate, On-the-Spot Lead Testing

- Perform blood-lead measurements with only 2 drops of blood
- In-office immediate results in 3 minutes
- Accuracy and sensitivity of a reference lab test (from capillary or venous blood sample)
- Two-drop sample size requires only a finger stick; allows combination of LeadCare II with other tests
- CLIA-waived, reimbursable test

Alere™

# Empowering Cardiovascular Treatment Decisions

**The right diagnostic tools** provide the timely, actionable data you need to make better in-office decisions that can improve your patient's quality of life.

**Complete Lipid Profile with the Cholestech LDX® System**

Get your patients to goal, and experience a smarter, faster workflow that improves office efficiencies. CLIA waived Lipid Profile, Glucose, and ALT•AST results in 5 minutes.

**Track Coumadin® Patients with the INRatio®2 System**

Empower face-to-face dosage change decisions that can help your patients stay in therapeutic range. CLIA waived, fingerstick PT/INR results in about 1 minute.

**Manage Heart Failure with the Triage® Meter**

Diagnose, assess severity, and risk stratify your patients at risk for heart failure in approximately 15 minutes, right in your office. BNP test is CLIA waived for whole blood.

**Be empowered. Connect to rapid results. Make smarter decisions.**

BIOSITE
NEW DIMENSIONS IN DIAGNOSIS

**Triage® Profiler S.O.B. (Shortness of Breath) Panel**

Rapid fluorescence immunoassay of the quantitative determination of creatine kinase MB (CK-MB), myoglobin, troponin I, B-type natriuretic peptide (BNP) and D-dimer in whole blood or plasma. Test devices include 2 levels of built-in controls. Results in approximately 15 minutes, read by Triage® MeterPro™ meter.

Measurement of 5 markers:

- Troponin I
- CK-MB
- Myoglobin
- BNP
- D-dimer

#97300, Panel
**(600-5715)** .....25/box

BIOSITE
NEW DIMENSIONS IN DIAGNOSIS

**Triage® Cardiac Panel**

Measures 3 key cardiac markers: myoglobin, CK-MB, and troponin I.

- Easy to use, with results in approximately 15 minutes
- Results read by Triage® MeterPro™ meter
- Whole blood or plasma

**(706-7343)** .....25/box

BIOSITE
NEW DIMENSIONS IN DIAGNOSIS

**Triage® MeterPro™ Meter**

High-performance, comprehensive cardiovascular and drugs-of-abuse testing in the laboratory or at the point of care (POC). Designed to provide diagnostic results quickly and easily. Quantitative diagnostic panel results are displayed and printed in easy-to-read numbers and highlighted when the result is above the cutoff. Qualitative diagnostic panel results are displayed as positive (POS) or negative (NEG), eliminating the need for interpretation of lines that often hamper qualitative diagnostics.

- 16 immunoassays available
- Results in about 15 minutes
- Whole blood, plasma, or urine
- Customizable test panels
- Onsite training and implementation support
- Results printed, displayed, and interfaceable
- Full connectivity support

NEW DIMENSIONS IN DIAGNOSIS

**Triage® D-dimer Test**

Rapid, quantitative immunoassay to aid in the assessment and evaluation of patients suspected of having disseminated intravascular coagulation (DIC) and thromboembolic events, including pulmonary embolism (PE) and deep-vein thrombosis (DVT).

- Performed on Triage® meters
- Provides rapid, quantitative results in approximately 15 minutes
- Utilizes highly sensitive fluorescence immunoassay technology
- Utilizes the 3B6 D-dimer antibody, which demonstrates high clinical specificity for PE and DVT

ABAXIS

**Piccolo® Point-of-Care Chemistry Analyzer Accessories**

The first broad-menu clinical chemistry analyzer designed for near-patient testing. *Basic Panel* contains BUN, Ca, Cl-, CRE, GLU, K+, Na+, and $tCO_2$. *Comprehensive Panel* contains ALB, ALP, ALT, AST, BUN, Ca, Cl-, CRE, GLU, K+, Na+, TBIL, $tCO_2$, and TP. *Lipid Panel* contains CHOL, CHOL/HDL (calculated), HDL, LDL (calculated), TRIG, and VLDL (calculated).

- General chemistry, liver, electrolyte, BMP, CMP, lipid, renal, and hepatic panels available
- No daily controls, calibrators, or maintenance
- Intelligent Quality Control (iQCT) verifies correct performance
- No special training required
- 0.1cc whole blood, serum, or plasma
- Single-use reagent discs
- Compact and portable
- Built-in QC and calibration
- Lipid panel is CLIA waived
- Whole blood, serum, or plasma
- Less than 2 minutes hands-on
- Results in under 13 minutes

#100-0000, Accessory Kit
**(106-6368)** .....ea

**CoaguChek XS® System**
PT/INR
Monitoring Solution
The next generation in point-of-care prothrombotin (PT) and international normalized ratio (INR) testing, this new system uses exclusive smart technology to help ensure accurate results and offers the flexibility and control that healthcare professionals need to confidently manage a wide range of anticoagulated patients. It is the only system to perform onboard quality control and determine patient results in a single test chamber.

- CLIA waived
- Neutralizes therapeutic levels of heparin and LMWH
- INR corrected for hematocrit within specified range; manage a broad array of patients with a single device
- Small sample size (10 µL) for easy dosing
- Strip allows dosing from either top or side for simple blood application
- Small, battery-powered, handheld meter for portability and efficiency
- Onboard controls; no external QC necessary
- Auto-on with strip insertion and auto-off capabilities
- 18-month strip shelf life; no refrigeration needed

3-Box Starter Kit
**(108-1861)** .....ea
Contains: XS Analyzer, 3 boxes of CoaguChek XS PT strips (144 total) & CoaguChek Lancets.

5-Box Starter Kit
**(108-7757)** .....ea
Contains: XS Analyzer, 5 boxes of CoaguChek XS PT test strips (240 total) & CoaguChek Lancets.

Battery
**(109-9303)** .....ea

10-Box Starter Kit
**(109-3345)** .....ea
Contains: CoaguChek® XS Plus Analyzer, 10 boxes (480 total) of CoaguChek XS PT test strips & CoaguChek lancets.

**CoaguChek XS® Test Strips**
For XS and XS Plus Meters
**(891-7593)**.....48/box
Contains: 24 strips per bottle, 2 bottles per box.

**VerifyNow™ Aspirin Assay**
A qualitative assay to aid in the detection of platelet dysfunction due to aspirin ingestion incitrated whole blood for the point-of-care or laboratory setting.

- Simple: 1-step, closed-tube sampling
- Rapid: results in 5 minutes
- Accurate: >99% specificity; 91.4% sensitivity
- Cost-effective: eligible for Medicare and private-payer reimbursement with CPT® Code 85576QW†; platelet aggregometry–arachidonic acid (agonist)

**(113-2708)**.....ea

**VerifyNow® Aspirin ASA**

**ProTime® Monitor**

- Accepts and stores patient and/or operator ID for reduced transcription errors
- Automatic: sends results quickly and easily to printer, computer, or LIS
- Only system that offers flexibility of both onboard and optional external quality controls
- Thromboplastin reagent of ISI=1.0 (AHA, CAP, and WHO recommended)
- Off-meter sampling provides safety against disease transmission
- Bar-coded cuvette: no coding necessary
- Longer open-pouch stability: up to 16 hours

Meter

HemoSense
**INRatio2® Monitor**
Allows you to obtain a prothrombin time (PT) and international normalized ratio (INR) result using 1 drop of blood from a fingerstick.

- CLIA waived
- Easy to use
- Single-button operation
- 1-step auto turn-on with strip insertion
- Larger LCD screen and easy-to-read digits
- Small, 1-drop (15 µL), sample size
- Wider test-strip area for easier sample application
- Test results in under 1 minute
- Test strips do not require refrigeration
- 2-channel, on-board quality control runs on every test
- No need for external liquid quality control or extra strips
- Test strips are individually wrapped and stored at room temperature

**BD™ Microtainer® Contact-Activated Lancets**

Designed with a positive patient experience in mind. The contact activation method facilitates a consistent puncture depth and minimizes the likelihood of having to repeat the puncture. It covers only a small area at the contact point, resulting in improved visibility of the puncture site for the clinician and greater accuracy of lancet positioning when performing the puncture. Its innovative ergonomic design allows for a more comfortable grip. The lancet automatically retracts into the device, which prevents the lancet from being reused. In addition, the lot number is laser-etched on each lancet for easier tracking.

# Making Blood Collection Safe, Precise, Simple

## Capiject® Safety Lancets

**High quality, single-use lancets offer the form, fit and function you've come to rely on.**

- Never see or handle the sharp
- One-step activation
- No special staging required
- Color-coded sizes

## Surshield® Safety Blood Collection Sets

**Help shield your staff against accidental needlesticks with Surshield.**

- Simple, one-handed activation
- Audible click for confirmation that needle is securely locked
- Available in 21G and 23G in 7" and 12" tubing, and 25G with 12" tubing.

Making a World of Difference

UNICO®

**Tube-Cubes®**

Available in 3 configurations to accommodate practically all of your needs. Each cube measures 2⅝"H x 2⅞"W x 2⅞"D. The 9-place version holds 8-mm to 16-mm/10-mL to 15-mL tubes. The 4-place version holds 26-mm to 30-mm/50-mL tubes. The single place version holds 66-mm cups, alcohol dispensers, small flasks, and more.

- Invert and pour: tubes will stay in place
- Great for phlebotomy trays
- Organize and store samples in refrigerator or freezer

#54900, 9 Place, for 8-mm–16-mm Tubes
**(112-4212)**.....4/pkg

#54400, 4 Place, for 26mm–30-mm Tubes

**(112-4214)**.....4/pkg

UNICO®

**Tube Rack**

Starting with a single 50-place T-Rack, you can attach as many racks as space allows. These patented racks attach together quickly and easily with their unique built-in T-connector, which allows the flexibility to attach as many racks as needed.

- Each rack holds up to 50 tubes of varying sizes in two 25-hole sections
- Top shelf has cross-referencing alphanumeric designation in order to track exact location of specific tubes in rack
- Attach additional T-Racks together; make a single large rack as big as needed
- Made of durable, autoclavable polypropylene; will not break or become brittle in low-temperature refrigerators
- Easy to clean and disinfect
- Arrives disassembled and can be snapped together in seconds
- Dimensions: 8¾" x 3¾" x 5¼"

#54500, 50 Place (Expandable)
**(111-7761)**.....ea

UNICO®

**Tube-Cube® Carrier**

Durable acrylic, and designed to hold any combination of Tube-Cubes. Available in 2- , 3-, and 4-place configurations. Provides a safe, convenient way to carry patient samples to the lab.

#54040
**(112-4213)**.....ea

FTR ENTERPRISES

**SmoothRack Test Tube Racks**

Features include:

- 72-tube capacity
- 9.7" x 5.0" x 2.6"
- Autoclavable polypropylene
- Accommodates test tubes 10 mm to 16 mm in diameter

- Access purchase history and real-time pricing
- Custom shopping list capability for easy ordering
- Paperless billing statement option
- Shop by procedure, chronic conditions, or simple, everyday essentials
- Access free MSDS documents for quick OSHA compliance
- Retrieve electronic statements and invoices for paperless environment
- 6 different specialty Web sites including Family Practice, Internal Medicine, and Pediatrics
- Access to promotions created uniquely for your specialty

UNICO

**PowerSpin™ FX Centrifuge**

Features a 6-place angled rotor designed for 2–10-mL tubes (maximum tube size up to 16 mm x 110 mm) and a fixed speed of 3400 rpm, generating 1350 RCF (g) for superior specimen separation. Set the 0–30-minute timer to desired run length.

- Maintenance-free, brushless motors run quietly at a fixed speed of 3400 rpm, emitting only 58dB, all with a low temperature rise
- Suction-cup rubber feet hold unit firmly in place while virtually eliminating vibration
- Lid features a gasket to reduce aerosol emissions, a window for strobe speed checks, and a safety interlock switch that cuts power to motor if lid is raised
- Accessories available on request: 8-place rotor and pediatric tube adapters
- 1-year manufacturer's warranty
- Dimensions: 10.2" x 11.8" x 7.9"
- Weight: 15 lb
- 115 V/60 Hz

UNICO

**PowerSpin™ LX Centrifuge**

Spin blood, urine, fecal materials, or semen at the best speed for each type of specimen with this powerful, variable-speed, 6-place centrifuge. Maintenance-free, brushless motor runs quietly at a fixed speed up to 4000 rpm, emitting only 58dB, all with low-temperature rise. Suction-cup rubber feet hold unit firmly in place and virtually eliminate vibration. Lid features a gasket to reduced aerosol emission, a window for strobe speed check, and a safety interlock switch that cuts power to the motor if lid is raised. Angled rotor accepts 2–10-mL tubes (maximum tube size 16 mm x 110 mm). Accessories available upon request: 8-place rotor and pediatric tube adapters.

- Speed range: 300–4000 rpm, generating up to 1850 RCF (g)
- 30-minute timer
- 1-year warranty
- Dimensions: 10.2" x 11.8" x 7.9"
- Weight: 15 lb
- 115 V/60 Hz

# Borosilicate Glass Culture Tubes

## Exceptional Quality Borosilicate Glass Tubes at Great Prices!

Globe Scientific introduces a new line of high quality borosilicate glass culture tubes. The tubes feature well-rounded bottoms and smooth, fire-polished rims. They are neatly packaged in heavy duty boxes of 250 and are shrink wrapped to keep them particle free. The boxes are compact and designed to fit into most test tube dispensers.

- Made from Type 1, Class A borosilicate glass to reduce pH changes and contaminants that may leach from tubes made from soda lime glass
- Dimensional specifications are rigidly controlled for reliable, uniform results
- Meets ASTM E890 specification, type 1 requirements
- Conforms to USP Type 1 standards
- Tubes are chemically inert
- Tubes can be used for tissue culture and blood banks
- Produced in an ISO 9001:2008 certified factory

**(168-9062)**.....ea

Contains: Crystal violet 0.10%, safranine O 0.25%, ammonium oxalate 0.03%, ethyl alcohol (SD-3A) 10%, & water & stabilizers 89.62%.

**Erado-Sol® Stain Remover**

A fast and effective biological and chemical stain remover that removes most medical and histological stains from hands, plastic, glassware, lab coats, floors, and laboratory equipment and surfaces. Phosphate-free, biodegradable, and pH neutral (7–8). Easy to apply—simply rub in gently and stain is gone in a matter of seconds. Rinse with water.

Erado-Sol removes:

- Most medical and histological stains
- Wright stain
- Fresh blood
- Iodine
- Lugol's stain

HENRY SCHEIN®
LabTeam™
SOLUTIONS FOR CLINICAL LABS

The Henry Schein LabTeam is a highly trained group of Clinical Laboratory Specialists offering expert lab consultation and analysis to assist your practice in advancing patient care, maximizing revenues, and cost containment.

- **A broad portfolio of the leading laboratory systems available in the market, offering you the best solution for your individual practice needs.**
  *As a distributor of a wide selection of the leading Laboratory Systems, a Henry Schein Clinical Laboratory Specialist offers you the best solution for your practice from the industry instead of just one brand.*

- **Financial analysis for capital purchases of laboratory equipment providing select recommendations and advantageous acquisition programs.**
  *A Henry Schein Clinical Lab Specialist will evaluate your current testing volumes to provide you a financial analysis to maximize your Laboratory solutions. In addition, Henry Schein Financial Services offers financial solutions to help you acquire the system your practice needs.*

- **Testing and volume analysis to maximize your lab efficiency.**
  *Our Clinical Lab Specialists can provide laboratory design and planning assistance to help you maximize your lab testing and revenues.*

- **Professional consultation for CLIA certification.**
  *The Henry Schein Lab Team can provide access to Laboratory consultants to help your in office achieve CLIA certification and OSHA compliance.*

- **Knowledgeable, ongoing customer support from our dedicated Laboratory support group.**
  *Our dedicated and experienced laboratory customer service will ensure that your ongoing ordering of consumables and reagents needs are efficiently satisfied.*

- **Laboratory custom solutions are available based on customer needs.**
  *Lot sequestering for reagents, calibrators, and controls are available for selected systems to keep your laboratory working smoothly.*

***Contact Henry Schein today for a comprehensive laboratory solution analysis with a Clinical Laboratory Specialist!***

HENRY SCHEIN® LabTeam™
SOLUTIONS FOR CLINICAL LABS

## Laboratory Solutions for Cardiovascular Testing

Heart disease is the leading cause of death in the US and is a major cause of disability. The most common heart disease in the United States is coronary heart disease, which often appears as a heart attack. In 2010, an estimated 785,000 Americans had a new coronary attack, and about 470,000 had a recurrent attack. About every 25 seconds, an American will have a coronary event and about one every minute will die from one.[1]

[1]Reference: www.cdc.gov/features/heartmonth

Maximize opportunities for improved patient care and enhanced revenues by using in-office laboratory testing for:

- Lipid blood tests
- Blood sugar tests
- Enzyme and protein tests
- Blood tests to determine risk of coronary artery disease
- Electrolyte tests
- Coagulation testing and CBC

**Henry Schein offers a full line of laboratory solutions. A Clinical Lab Specialist can help upgrade your in-office laboratory with industry-leading solutions such as:**

SIEMENS
Dimension® Xpand® Plus
Integrated Chemistry System

HORIBA Medical
Pentra 80XL Hematology

BECKMAN COULTER Primary Care Diagnostics
AU480/AU680
Chemistry Analyzer

BECKMAN COULTER Primary Care Diagnostics
LH-500 Hematology

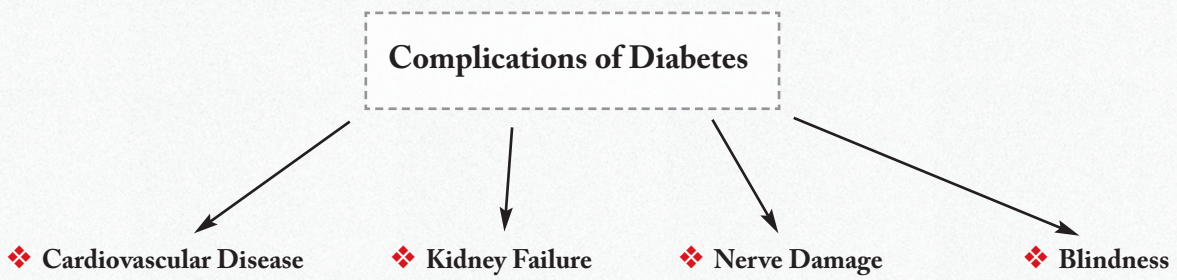
HENRY SCHEIN®
LabTeam™
SOLUTIONS FOR CLINICAL LABS

In 2011, the American Diabetes Association reported that 25.8 million children and adults in the United States, or 8.3% of the population, have diabetes. This is a 9.3% increase in diagnosed cases versus 2009 reports. Of the 25.8 million,18.8 million have been diagnosed—whereas nearly 7 million more have undiagnosed diabetes. Even more sobering is that nearly 79 million are estimated to be prediabetic.

With diabetes and prediabetic syndrome on the rise, elevated glucose levels are not the only concern. The graphic below illustrates just a few of the common complications that can arise from diabetes.



## Complications of Diabetes

When glucose levels are not maintained, diabetes can result in serious long-term complications such as cardiovascular disease, kidney failure, blindness, nerve damage, high-risk pregnancies, and even death.

Given the scope of the disease and predisease state, it is recommended that diabetics have regular assessments covering the following parameters:

| Glycemic Control | Renal Function | Cardiovascular | Liver Function |
|---|---|---|---|
| Glucose<br>Hba1c<br>Fructosamine | Sodium, Potassium, Bun, Creatnine, $CO_2$, Urinary Microalbumin, Urinary Total Protein, Urinary Creatnine | Total Cholesterol, HDL, LDL Triglycerides, CRP, Apolipoprotines A&B | Total Bilirubin, GGT, ALT, AST, ALP, Albumin, Total Protein |

HENRY SCHEIN®
LabTeam™
SOLUTIONS FOR CLINICAL LABS

## Hemoglobin A1C Testing

Studies have shown that diabetic patients with increased hemoglobin A1C levels are more likely to experience cardiovascular disease. Because of this, hemoglobin A1C testing is extremely important for managing diabetes, as it can help to monitor and diagnose precursory conditions of diabetes and cardiovascular disease. Within the past 10–12 years, Hemoglobin A1C has become the number one indicator of diabetic control. The ADA announced that A1C assays are now accepted as diagnostic and screening tools in its Standards of Medical Care in Diabetes — 2010 to determine not only diabetic risk but cardiovascular disease risk as well. By testing diabetic patients regularly for blood glucose levels, hemoglobin A1C, and cardiac risk, physicians can gain a better overall picture of a patient's health and prognosis. With regular testing of all adult patients, physicians can help diagnose those who are unaware of their disease, helping to reduce the risk for coronary disease and other complications resulting from diabetes.

## Lipid Profile Testing

When monitoring a diabetic patient, a Lipid Profile is an important test that will determine risk of coronary heart disease. The levels of Total Cholesterol, triglycerides, HDL, and LDL provide valuable information to guide the health care provider in determining a treatment plan to maintain healthy levels and reduce the risk of a cardiac event.

## Kidney Function Testing

When diabetes is not controlled, high blood sugar levels can cause damage to many organs such as the kidneys and heart. The presence of albumin in the urine is regarded as the first sign of kidney disease. Both the National Kidney Foundation and the American Diabetes Association recommend testing for and measuring albumin in a spot urine sample with an albumin to creatinine ratio. Patients with two or more positive tests spaced by one to two weeks should undergo further evaluation and management for chronic kidney disease using quantitative measurements.

**Henry Schein offers a full line of Chemistry Systems for an entire spectrum of testing volumes including:**

**SIEMENS**
The full line of SIEMENS Dimension® Chemistry Systems

BECKMAN COULTER

HENRY SCHEIN® LabTeam™
SOLUTIONS FOR CLINICAL LABS

## Laboratory Solutions for Allergy Testing

Allergies are nothing to sneeze about. According to the American Academy of Allergy Asthma & Immunology, "Allergic disease is the fifth leading chronic disease in the US and third among children under 18 years of age. Allergies are among the most common chronic conditions worldwide. For some people, allergies can trigger symptoms of asthma and in the most serious cases, a life-threatening reaction called anaphylaxis can occur."

## Improved Testing

Recent technological advances through in vitro allergy testing now provide the tools for physicians of all specialties to diagnose a specific allergy in the primary care setting without the extensive training necessary for in vivo testing. Blood tests performed in the lab can measure the concentration of multiple IgE specific allergens in the circulation. You can test patients from birth to adult and help put a stop to the allergy march.

### Advantages of Testing Allergens in the Lab

- One blood draw for multiple allergens
- Is quantitative and reproducible
- Not affected by medications
- Eliminates risk of anaphylaxis reaction

A Henry Schein Clinical Lab Specialist can help you leverage the advantages of testing allergens in the lab and bring revenue opportunities to your practice with a solution such as:

IMMULITE® 2000

## SIEMENS

Siemens' proprietary liquid allergens are the key to making IMMULITE® 2000 allergy tests sensitive, specific, and reliable. The soluble polymer/copolymer support for the allergens increases the number of binding sites and their accessibility to allergen-specific IgE antibodies. Enzyme-enhanced chemiluminescent signal detection provides increased sensitivity and the proprietary wash technique enhances specificity.

HENRY SCHEIN® LabTeam™
SOLUTIONS FOR CLINICAL LABS

## Laboratory Solutions for Measuring Vitamin D in the Lab

### Vitamin D Deficiency

In the United States, approximately 77% of adults are either insufficient or deficient in vitamin D, according to the National Health and Nutrition Examination Survey (2001 to 2004).

Vitamin D deficiency has long been associated with bone disease but more recently vitamin D has become a general health indicator as associations with major conditions such as cancer, cardiovascular disease, autoimmune disease, diabetes, and chronic kidney failure have been discovered in epidemiologic, clinical, and observational studies. Knowing the significance of vitamin D testing facilitates informed decision-making and helps health care professionals to maximize the quality of care they provide for their patients.

### Vitamin D Toxicity

This typically occurs due to vitamin D over-supplementation and is observed in patients taking more than the prescribed 40,000 IU per day. When vitamin D levels are this high, calcium concentrations rise as well, which can result in nausea, weight loss, and constipation. As a result of increased levels of vitamin D and calcium the patient can develop kidney stones.

### Vitamin D Testing

The FDA has cleared the Siemens Healthcare Diagnostics Vitamin D total assay for use on the ADVIA Centaur®/XP Immunoassay Systems. The assay, measures the total level of 25-hydroxyvitamin D in serum and plasma to aid in the assessment of vitamin D sufficiency. Measurement of [25(OH)D], the most widely used indicator of vitamin D status, ensures accurate evaluation of patients for deficiency, sufficiency, or toxicity.

The ADVIA Centaur® XP

**SIEMENS**

The ADVIA Centaur®/XP Immunoassay System also includes a comprehensive menu including Anemia, Bone Metabolism, Cardiovascular, Fertility, Infectious Disease, Oncology, TDM, and Thyroid

### Start Testing

Our experienced and dedicated LabTeam can assist you in accurate diagnosis, including a Financial Analysis.
A Henry Schein Clinical Lab Specialist will evaluate your current testing volume to provide you with a financial analysis that can maximize the return on investment. In addition, our Financial Team can offer solutions to help you acquire the system your practice needs.

HENRY SCHEIN® LabTeam™
SOLUTIONS FOR CLINICAL LABS

## Laboratory Solutions for Metabolic Syndrome

Metabolic syndrome is a common condition that goes by many names (dysmetabolic syndrome, syndrome X, insulin resistance syndrome, obesity syndrome, Reaven's syndrome). Most persons identified as having this syndrome have been educated about the importance of checking their lipid levels, watching for signs of diabetes, having their blood pressure monitored, and exercising—but there has been little to tie all of these factors together except pursuit of a "healthier lifestyle."

The National Heart Lung and Blood Institute (NHLBI) estimate that, in the US, about 47 million adults (25%) have metabolic syndrome. It can affect anyone at any age, but it is most frequently seen in those who are significantly overweight—with most of their excess fat in the abdominal area—and inactive.

Continued management should include laboratory testing for:

- **A triglyceride level** higher than 150 milligrams per deciliter (mg/dL), or 1.7 millimoles per liter (mmol/L), or you're receiving treatment for high triglycerides.
- **Reduced HDL** ("good") cholesterol — less than 40 mg/dL (1 mmol/L) in men or less than 50 mg/dL (1.3 mmol/L) in women—or you're receiving treatment for low HDL.
- **Elevated fasting blood sugar** (blood glucose) of 100 mg/dL (5.6 mmol/L) or higher.

Metabolic syndrome is a set of risk factors that includes: abdominal obesity, a decreased ability to process glucose (increased blood glucose and/or insulin resistance), dyslipidemia, and hypertension. Patients who have this syndrome have been shown to be at an increased risk of developing cardiovascular disease and/or type 2 diabetes.

A Henry Schein Clinical Lab Specialist can offer a complete line of Chemistry Systems suited for your patient load and testing volumes including:

ALFA WASSERMANN
Diagnostic Technologies, LLC

The ACE Alera clinical chemistry system

## Laboratory Connectivity

Henry Schein's Clinical Laboratory Specialists will help you connect all of your Laboratory Equipment to a Laboratory Information System (LIS) to help you:

- Consolidate lab reports
- Archive and trend patients
- Store QC
- Seamlessly integrate to a third-party reference lab
- Access the results via the Web

The LIS can be connected to the EHR to simplify patient management, capture billings, and update patients' records.
